

**Regaining
Independence
Close to Home**

Inpatient Rehabilitation

Our Inpatient Rehabilitation team provides outstanding personalized rehabilitation and medical care to patients with life-altering impairments in order to return them to their highest level of independence.

- Three Hours of Specialized therapy that includes at least two different therapy services
- Certified Rehabilitation Registered Nurses
- Board-Certified Physical Medicine and Rehabilitation Physician
- Community Re-entry Program
- In-Home Safety Evaluations
- Trial-Independence Program

Our staff provides the best possible care. Inpatient Rehabilitation assists patients to achieve optimal health and functional ability. It is designed to provide a continuity of care.

Assisting patients with Parkinson's, joint replacement, hip fracture, brain or spinal cord injuries, past heart attack, stroke, and other debilitating illnesses.

An interdisciplinary team – your physician, nursing staff, case

manager, dietitian, pharmacist, activity director, therapists such as physical, occupational, or speech and other ancillary staff – in collaboration with you and your family will provide a holistic approach to your care.

Helping our patients become as independent as their potential allows is our goal. Proper care, rehabilitation, respect, and understanding will always be available from our staff, who will provide individualized care.
